Synchronised Business Systems are the key enabler for high performing businesses

Why do I need Essatto?

International IT Research and Advisory group Gartner* warned that the business community needed to be a wake-up call and shocked many with its prediction that:

"Through 2012, more than 35 per cent of the top 5,000 global companies will regularly fail to make insightful decisions about significant changes in their business and markets."

Even though Gartner's comments were focused on top tier businesses, there is relevance to every sized-business. If the top tier aren't getting it right, medium-sized businesses should consider how they compare. Now is the time improve business systems to move from recording mechanisms to being more capable to support the dynamic and complex decision-making that every business increasingly being faced with every day.

Ask yourself if you can easily obtain a picture of your business position at any time of the month?

Do you scramble when the bank wants an up to date set of numbers?

Do you spend more time chasing or collating your numbers that actually analysing them?

Is your budget a distant memory and not relevant to your current activities?

But the biggest question of all is:

Do you have faith in your business numbers?
